

***Haliotis rufescens* Swainson** measures 180 mm. It has excellent deep red color. The margin is not perfect and there are sponge-type borings on the posterior end. There is a small bit of encrustation between the margin and the vent holes. Data: Point Lobos, Big Sur Coastal Area, California, USA Collected by Hal Shephardson June 1928  
**Quality:** Any noticeable flaws are in the description.
