

Mitra (Strigatella).assimilis-17.46mm. Hawaii Black Miter Shell-Hawaiian Specimen Seashell

**an excellent Hawaiian Black Miter Shell--
Mitra Strigatella assimilis--Pease, 1868.**

This excellent shell measures approximately 17.46mm. by digital caliper and is in F+++ condition with excellent protoconch and beautiful color, great sculpture and markings. This outstanding shell is about average size for the species and was collected in 4 feet of water on the Windward Shore of Oahu in rubble. It is in very nice condition compared to the norm of this usually rough shell.
