

**CHICOREUS RAMOSUS - DARK SPECIMEN NEW
CALEDONIA 128.3 mm F+++/GEM**

Quality: F+++/GEM I see no important flaws.

Collected: Collected by diver on rocks at 5 meters on the East coast of Yenghebane Island, New Caledonia, 1992. (Ex Coll J&J Demartini)

Comments: After cleaning this specimen looks great with its dark colors.
