

**HEXAPLEX KUESTERIANUS - SUPERB QUALITY
SPECIMEN 91.0 mm**

Quality: F+++ / GEM I see no important flaws.

Collected: Collected by Russian collector partly burried in muddy sand at Masirah Island, Oman, January 2019.

Comments: Fantastic quality specimen. Super hard to find them this good. This specimen is found in sand only. Specimen with longer spines are found in only sand. The rounded spines are found in rocky sections.
