

***Phyllonotus margaritensis*, Abbott 1958**

**Gorgeous dark form! Giant. Unique. 104.1 mm F++/Gem
Venezuela. Giant. Very beautiful and colorful. Unique dark
pattern. Cream, white, brown color top with black, brown
marked varices and knobs. Only one. Don't let this dark
murex slip through your collection. Slightly thin lip.
Pictures don't do this shell any justice. The white spots on
the shell are from the camera.**
