

***Neverita duplicata* (Say, 1822)**

Super giant Gem Polinices duplicatus with operculum- fantastic!! Just out of the water 9/12/17 a monster at 56+ mm.! Fire Island Inlet at dead low tide burrowing in sand at 5 ft water Suffolk Co. Long Island . This species lives a tough life and predates on clams as well as other gastropods so lip is naturally rough but not in this ultimate specimen,you will NOT find a better lip!!! As good as this species gets! Please note - We sell only live taken specimen shells, not craft junk!
