

Pecten langfordi that is 30.9mm (maximum dimension). Sunrise shell.

- Beautiful super bright red color and exceptional pattern on the outside and with a dark inside. Large size.- This is a whole, natural pair. One side is always the "yellow" and the other the "red".
- These hard to get deep water shells are highly prized both as specimen shells and for jewelry.
- The whole shells are always hard to get.

Found on the island of Oahu, Hawaii.
