

Pecten langfordi that is 22.7mm (maximum dimension).
Sunrise shell.

- Beautiful bright red color and super pattern on the outside and with a dark and glossy inside.
- This is a whole, natural pair. One side is always the "yellow" and the other the "red".
- These hard to get deep water shells are highly prized both as specimen shells and for jewelry. Not big but the color is killer.
- The whole shells are always hard to get.

Found on the island of Oahu, Hawaii.

133 \$, May 2019
