

SPONDYLUS AMERICANUS - MARTINIQUE 77/98 mm

Quality: NO RATING Impossible to rate a Spondylus but as you can see this is a specimen of the better quality. Please judge the photos.

Collected: Collected by diver at 20 meters, off Le Marin, Martinique. (77 / 98) (Respectively without and with spines)

Comments: I have tried to clean this specimen with my ultrasonic needle as good as possible without bringing any of the spines in danger of breaking off.
