

SPONDYLUS FOLIACEUS - TOP SPECIMEN INABANGA SPECIMEN ± 122 mm -

Quality: NO RATING It would be hard to rate a Spondylus. But very nice quality.

Collected: Collected by local fishermen at various depths in the Visayas region, Philippines, 2016.

Comments: Nice long sponlike spines and pink color. It took me a while to clean these Spondylidae but the result is beautiful . Size is measured largest size spine to spine.
