

SPONDYLUS PRINCEPS - MEXICO 61/98 mm

Quality: NO RATING Impossible to rate a Spondylus but as you can see this is a specimen of the better quality. Please judge the photos. Size with without and with spines respectively.

Collected: Collected in Loreto Bay, Baja California Sur, Mexico.

Comments: I have tried to clean this specimen with my ultrasonic needle as good as possible without bringing any of the spines in danger of breaking off.
