

Spondylus tenellus 67mm 33g FABULOUS PINK
AUSTRALIAN BEAUTY

**Spondylus tenellus (Reeve, 1856), Forster,
New South Wales, Australia, from offshore
reefs in 12m depth, live taken specimen shell.**

Description: **A particularly beautiful specimen,
deeply cupped with wild spines on both sides
and no visible attachment area , very hard to
get this nice. All natural of course and
carefully cleaned by hand.**
