

**SPONDYLUS VERSICOLOR - ORANGE & WHITE SPINES
THAILAND 80.0 mm -**

Quality: NO RATING Please judge the photo's. It is impossible to rate a Spondylus.

Collected: Collected by Gypsy diver at 15 to 20 meters on shallow reefs around Phuket Island, Thailand.

Comments: Fantastic specimen. For me this is a very high quality specimen. I have cleaned with an Ultra Sonic tool as much as I could. It is no longer allowed to collect Spondylidae on Phuket Island.
