

Huge Strombus Goliath specimen shell measuring approx.345mm!!!
A very rare find in this condition and size. In excellent F+-F++
condition. Apex intact as well siphonal canal. Lip is natural and
unfiled. Very minor chips in lip edge. Periostracum mostly intact as
well. Aperature has Rich color and good gloss. A true collectors
piece. There are two bivalve halves on the crown of the shell that
could be removed with further cleaning if desired.
