

*Tonna variegata*. It measures 209 mm (8.25 inches). It is in good condition. Great color and pattern. But there is a small flake on the surface of the shell just under the spire. There are nicks on the shelf opposite the lip, and the lip appears to have been filed. This shell was live collected in Newcastle, New South Wales, Australia. I purchased this shell in 1971 from the Gloria Pride Collection, Lynn Beach, Massachusetts.
