

Turridrupa Weaveri WO (Powell, 1967). Location: S Shore, Oahu, HI
Grade: F+++ . Size: 20.5mm. Notes: This Turridrupa Weaveri was self
collected on a day dive in 100ft under a med sized rock on its base,
just found and cleaned out with the OPERC, it has an excellent corded
pattern and it is the ONLY ONE ON EBAY, I really don't see these to
often.
