

*Lioconcha Hieroglyphica* (Conrad, 1837). Location: S Shore, Oahu, HI Grade: F+++/Gem. Size: 21.0x25.0wmm. Notes: This *Lioconcha Hieroglyphica* was self collected on a day dive in 3-5ft as I was coming in from a dive mixed in rubble and sand, could not find an exact match in all my Hawaiian books as this name is for its deeper cousin that we find in 60-100ft. This shell was just found and cleaned out and have a dark rich pattern, I personally could not see anything wrong with this Specimen. Don't let this *Lioconcha Hieroglyphica* slip through your fingers
