

***Festilyria festiva deceptrix*, Palazzi, 1981**

**Unusual black form! 107.1 mm**

**Masirah Isl. Oman. Fantastic! Crazy specimen. Black form of *Festilyria* are found on Massirah, not like the "classical" *deceptrix*. This specimen characterized by larger sizes and a very dark color, from dark/bordo to almost black. This type is very rare. This specimen is found dead, it has a shiny surface and a very beautiful color. Lip broken**
