

## **Cymbiola aulica**

**Origin:** P/Isles.

**Author:** Sowerby 1825

**Size:** 113mm; **Grade:** F2

" *Princely Volute / Courtier Volute* " An excellent size. The outer lip is very thick, a minor anomaly on the posterior curve of the lip otherwise very good. Nice color.

The protoconch separates it from the similar shell *vespertillio*, larger & completely smooth is *aulica*, ribbed with axials is *vespertillio*.
