

Cymbiola thatcheri

Supernice orangered banded specimen, typical pattern from Chesterfield Reef,

Very mature thick perfect outer lip. Flawless live collected specimen.

Remarks: A very famous and beautiful volute from a very restricted area in the Coral Sea, Northern Queensland.

RARE. Extremely hard to get now, almost invariably from old collections.

Chesterfield Reef, Coral Sea, Northern Qld, 1990's ex LRM ref. coll.

75,2 mm GEM
