

***Voluta musica minuta*, Lamarck, 1811**

!!! SPECIMEN FROM MY PERSONAL COLLECTION !!!

Fantastic pattern! Very rare form! 51.9 mm Gem Aruba. Very rare subspecies. Fantastic specimen with very clear patten. Gently creamy color and yellow aperture. This specimen is similar to a toy that you want to constantly consider and keep one's hand out. From my personal collection.

Pictures don't do this shell any justice. The white spots on the shell are from the camera.
