

**Volutoconus grossi (Iredale, 1927), 67 mm,  
Coffs Harbour, New South Wales, on reef 22m  
depth, live taken specimen shell.**

Description: **Beautiful pink color slightly  
mottled, flawless growth all over, and the tiny  
apex preserved in perfect condition; only ten  
years ago such a shell would have been a  
prized possession among conchologists!**

**16 \$, juin 14**
